WHO'S FASTER?

Find the answers as fast as
you can

01

SKIMMING (General)

- Quickly read a text to find the main idea of a text. (first paragraph, first and last sentences of each paragraph, last paragraph)
- Read titles and headings.
- Read words / sentences in **bold** or *italic*.
- Look at the pictures.

02

SCANNING (Specific)

- Look for keywords in questions.
- Look for dates, and numbers.
- Look for names.

SKIMMING OR SCANNING?

(general or specific)

1. Looking for a name in a reading.
2. Looking for a number in a reading.
3. Reading the first and last paragraphs.
4. Reading the titles and headings.
5. Looking for keywords in the question.
6. Looking at the pictures.
7. Looking for a number.

General Questions

1. What are totem poles?
2. “The totem pole can also be a monument,” how?
3. Animals are carved on the totem poles, which ones?

Raven

True or False

1. Totem poles are used to scare off unwanted guests (T / F)
2. Totem poles are related to important people or events (T / F)
3. The totem in the photo is from Vancouver (T / F)

Multiple Choice

1. In Haida culture, the raven can be:
a) a visitor b) a magician c) a memory
2. Most totem poles are carved from:
a) oak wood b) cedar wood c) birchwood
3. Totem poles are:
a) works of art b) welcoming to visitors c) both

Totem poles

Totem poles are tall wood carvings. They are made by West Coast First Nations.

Most totem poles are carved from cedar wood.

You can see totem poles in many places throughout BC. There are totem poles in Stanley Park in Vancouver. There are also totem poles in Victoria, Sechelt, Alert Bay and Haida Gwaii.

A work of art

A totem pole is a work of art.

A totem pole can welcome visitors to a building.

The totem pole can also be a monument. It can honour a famous person or event. For example, a totem pole might honour the memory of the chief of a tribe.

During a feast, or potlach, totem poles can also be put up to greet important visitors.

Tell stories

Totem poles can also tell stories. They show stories through the carvings. The stories can be legends or myths. The stories can be the history of a family.

What are the carvings?

Some of the carvings on totems are animals. Common animals include bears, wolves, whales, frogs, eagles and ravens. Each animal has a meaning.

For example, in Haida culture, the raven can be a magician. The raven tells the story of the beginnings of Haida Gwaii.

PUT THE STORY IN THE CORRECT ORDER

MAYBE

Read Steve's story as quickly as you can,
and write the correct number on the line.

- _____ His teacher was not happy.
- _____ so he ran to school.
- _____ He quickly got dressed,
- _____ Steve was late for class.
- _____ He missed the bus,
- _____ Finally he made it to class.
- _____ but he did not have breakfast.

here if you need it

1st ANNOUNCEMENT

Mercury is the closest planet to the Sun and the smallest one in the Solar System—it's only a bit larger than our Moon. The planet's name has nothing to do with the liquid metal, since it was named after the Roman messenger god

HIGHLIGHTS OF THE MONTH

MARS

Despite being red, Mars is actually a cold place. It's full of iron oxide dust

JUPITER

It's a gas giant and the biggest planet in our Solar System

SATURN

It's the ringed planet, composed mostly of hydrogen and helium

A PICTURE ALWAYS REINFORCES THE CONCEPT

Images reveal large
amounts of data, so
remember: use an image
instead of long texts.

A person is sitting on a concrete surface, wearing a dark blue jacket with yellow and white striped cuffs and light blue jeans. They are holding an open book with a yellow cover. To their left, on a white rectangular object, is a red onion and a pair of glasses. A bright pink bag is also visible on the ground.

IN DEPTH

SATURN

Yes, this is the ringed one.
It's a gas giant, composed
mostly of hydrogen and
helium

JUPITER

It's the biggest planet in
our Solar System and the
fourth-brightest object in
the sky

IN DEPTH

VENUS

Venus has a beautiful name, but it's terribly hot

SATURN

Saturn is the ringed planet and a gas giant

MERCURY

Mercury is the closest planet to the Sun

SECTOR NEWS

MERCURY

Mercury is the smallest planet in our Solar System

VENUS

It has a beautiful name and is the second planet from the Sun

MARS

Despite being red, Mars is a cold place. It's full of iron oxide dust

SATURN

It's the ringed planet, composed of hydrogen and helium
